

Ideas for wider reading

Strong applicants to Cambridge and other competitive universities have often explored their chosen subject through wider reading outside of their A Levels. This is called ‘supra-curricular’ activity, rather than ‘extra-curricular’, as it is primarily academic exploration, building on what you are studying in school or college.

The selection of reading lists and resources below have been gathered from Cambridge departmental and College websites, as well as the websites of other universities and online resources. **These lists are certainly NOT ‘required reading’ for Cambridge applicants and you are in no way expected to have read them before interview.** They simply provide some suggestions for places to start exploring your own academic interests independently.

It is important to critically engage with your wider reading: think about the authors’ arguments and use of evidence, and whether you agree. Reading quality news sources can be a useful way to encounter stories relevant to your academic interests and, more generally, to practise assessing arguments and weighing evidence. Some suggestions include:

- Broadsheet newspapers: The Guardian, The Times, Independent, Daily Telegraph
- BBC News online: www.bbc.co.uk/
- Al Jazeera English: www.aljazeera.com/
- The Economist: www.economist.com/
- CNN online: <http://edition.cnn.com/>
- The New Statesman magazine: www.newstatesman.com/

There’s also a wealth of resources, including entire undergraduate courses available for free with online lectures, downloadable course notes and academic discussion groups, available on sites including:

- www.coursera.org
- <http://ocw.mit.edu/courses/>
- www.edx.org/courses
- <http://www.khanacademy.org/>
- <http://oyc.yale.edu/>

You do not need to buy any books – as well as using web resources, it is always worth visiting your local library as well as your school or college library. If you have a university near your home, you might be able to gain access to their library collections as well, which will include more specialist academic books and journals. Whichever library you visit, try speaking to librarians and asking them

Disclaimer: This list of suggested resources for wider reading is designed as a set of informal suggestions and does not necessarily represent official policy of the University of Cambridge and its Colleges.

to suggest relevant reading and online resources on particular subjects, or to order in books which you would like to have a look at.

If you are looking for suggested reading which is specific to Cambridge, it is worth checking College websites for their reading lists for offer holders, as well as looking at the relevant faculty pages; for example, King's College has particularly useful lists arranged by subject:

www.kings.cam.ac.uk/study/undergraduate/offerholders/reading-lists/index.html

Reading is a great way to explore subjects which you find interesting – but there are other ways to deepen your understanding: visit your local museums, monuments, galleries and natural features, and think analytically about nature, machinery or the built environment. Keep an eye out for seminars, taster days or other Outreach activities run by any local Universities which you could attend, or you might like to join a regional or national club or society related to your academic interests, and enter competitions such as essay prizes or maths Olympiads.

The best thing about super-curricular activities is that there are no exams or deadlines to worry about – you are free to follow your own lines of enquiry into the areas that interest you the most! Rather than seeing this as an exercise purely to give you something to write about in your personal statement, you should take time to explore things that you genuinely find interesting. Most importantly, you should enjoy your wider reading: don't feel pressured to read something just because it might look 'impressive' – use it as an opportunity to develop your own academic interests.

These suggested sources of wider reading begin with some university reading lists for prospective students or undergraduates, and then include links to websites of organisations or publications which may provide further resources. They have been arranged alphabetically in categories according to the Cambridge undergraduate courses, but students applying to other university courses should be able to find relevant resources by looking at the lists for related subjects.
